

Lab 1 Submission Format

Submit all your code in a single python file. Include the question number as a comment before the snippet of code relevant to the question (refer to screenshot below). We will not be able to deduce which parts of your code is intended for a particular question if you fail to do this.

Note: Your code will be run sequentially hence you do not have to re-import or re-initialise certain variables for each part.

```
# Question 1a
randomString = "abcde"

for char in randomString:
    print(char)

#Question 1b
import time
timerCount = 10

for i in range(1,timerCount + 1):
    time.sleep(1)
    print(i)
```

Figure 1: Code Snippets with comment showing the Question number.

For questions that require you to display any sort of output or provide explanation, please take screenshots, and give your explanations in a PDF/Word document.

So, you will have to submit 2 files in total in a zip folder: a python file with all the relevant code as well as a word/pdf document containing screenshots/explanations.

Submit both files in a single zip folder. Please follow the following naming conventions.

Python File: **EE3801_Lab1_A0xxxxxx.py**

PDF Document: **EE3801_Lab1_A0xxxxxx.pdf**

Zip Folder: **EE3801_Lab1_A0xxxxxx.zip**
